Firefly ES201

Compact LED Light Source

WIRELESS

With a rechargeable lithium battery, the ES201 provides unparalleled flexibility in performing endoscopic observations.

5 WATT LED

Provides maximum brightness to produce top quality endoscopic imaging.

LIGHTWEIGHT

Based on a lightweight but rugged construction, the ES201 is easy to use without hindering mobility during endoscopic applications.

SPECIFICATIONS

Length: 120mm

Diameter at tail: 22mm

Diameter at tip: 16mm

Weight (w/o batt): 60gm

Weight (w/ batt): 107gm

Operation: 4+ hours

- **Completely Wireless Operation**
- **5 Watt Ultra-Bright LED**
- **4 Hour Operation**
- **2 Rechargeable Batteries and AC Charger Included**
- **Compatible with Storz-style Threading**
- **Ideal for Mobile Endoscopic Applications in a Variety of Fields**

Firefly ES201 is a compact, high powered LED light source compatible with standard endoscopes and the Firefly DE1250 Wireless Endoscope Camera. It provides brilliant LED lighting for a variety of applications. Powered by a long lasting, rechargeable lithium battery, this light source is a truly innovative and mobile solution uninhibited by wires. Unlike other portable light sources, the ES201 delivers these breakthrough capabilities - and much more - at a highly economical cost.
